PROGRAM OVERVIEW

This program is designed to prepare qualified entry-level sonographers who are highly skilled, technically competent, ethical, professional,

compassionate, and responsive to the needs of patients and of employing organizations. Sonographers use technologically advanced equipment that utilizes high-frequency sound waves to produce dynamic visual pictures of internal body structures. Physicians evaluate the images to make a medical diagnosis.

Course work includes sonographic physics, sonographic appearance of normal and abnormal anatomy, physiology, pathology, and pathophysiology of the abdomen, pelvis, and small parts of the adult, pediatric, and fetal patient, clinical application courses, interventional sonography, journal and case study review, and comprehensive registry reviews.

This is a competitive admissions program. Please see the Admissions section of the Student Handbook/Catalog for more information.

Program length is seventy-eight (78) credit hours.

Columbus Technical College is accredited by the Southern Association of Colleges and Schools Commission on Colleges.
