

Backflow Prevention

COURSE INFO

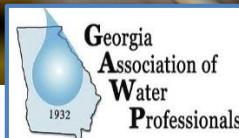

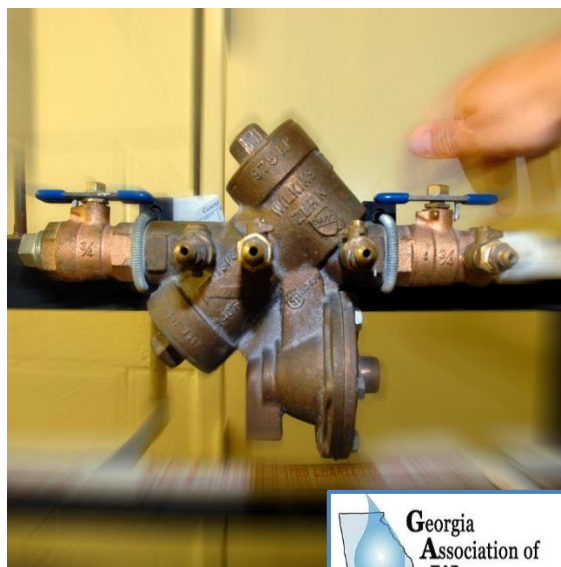

Are you interested in Backflow Prevention Tester certification?

Get hands-on experience as you review the basic concepts of:

- Hydraulics
- Field test procedures
- Troubleshooting backflow prevention assemblies
- Cross-connections
- Hazards associated with cross-connections
- Circumstances that may cause backflow

Prerequisite: Prior industry experience in plumbing, irrigation, fire prevention, water distribution systems or related areas.

A Continuing Education Unit (CEU) certificate will be issued upon successful completion of the class.
